John S Clark Company, LLC is pleased to announce the promotion of William M. (Bill) Sinclair to Vice President and Manager of the company's Special Projects Group.

Mr. Sinclair joined the company in 2005 as Director of the Special Projects Group which is headquartered in Winston-Salem. His experience in the construction industry includes several years running his own company. The Greensboro Builder's Association awarded him their Golden Hammer Award in 2000 in recognition of his dedication to serving his clients.

Since joining JSC, he has completed dozens of projects including Hand & Rehab Specialists and Marley Drug. He is especially proud of the repeat client work such as Breugger's Bagels, BB&T and Truliant.

The Special Projects Group focuses on tenant improvements, renovations, additions and new construction in the light commercial and office sectors across the Triad. Every project, regardless of size gets the same high level of attention and consideration.

Jim Walker, President of John S. Clark Company, LLC, expressed the company's appreciation for Bill's efforts and his quick achievement of the ambitious goals set when the Special Projects Group was formed in 2005. "We have been extremely pleased with the effort and the results since Bill came on board. Clients know they can count on him to complete the project safely, on time and within the owner's budget even without a lot of detailed plans. However, the quality that his clients talk about the most is his ability to make the whole building process a pleasant experience. He has the ability to communicate news, good or bad, with equal professionalism and honesty which makes him a much sought after building partner."

John S. Clark is the largest Triad based General Contractor. The firm operates full service offices in Mount Airy, Winston-Salem, Greensboro and Wilmington and has fully integrated design/build capabilities. In addition to the Special Projects Group, the company has core competencies in Industrial, Retail, Multi-Family, Health Sciences and Commercial construction.
